

Part Number Builder

Don't let your customers waste valuable time researching complicated part numbers—EETech's convenient prompts guide the process, providing an effortless way to get a quote or make a purchase.

Our robust design tools are engineered to bridge the gap between awareness and E-commerce, building a demand generation foundation that helps you reach your business goals. We're focused on engaging engineers throughout the design journey by utilizing real time data, customizable interfaces, and scalability.

The EETech Difference

We're a specialist, not a generalist. That means we build comprehensive, electronics industry-specific tools that acquire, engage, and convert buyers. Easy to integrate in your existing site and simple to implement, EETech's Part Number Builder will enhance your site, buyer's journey, and user experience. Because our design and content teams work primarily in the electronics industry, we deliver the kind of industry-specific solutions that no one else can.

Skip the search

Complex industries and intricate product data call for detailed part search. Find the exact numbers you need with the amount of information your customers have—whatever that may be.

Build customer loyalty

Convert prospects to lifelong customers with a straightforward approach to generating part numbers. Customize a part number builder that meets your exact requirements and addresses the changing needs of your customer.

Increase sales

Easily provide customers with accurate price quotes by preventing them from selecting part options that don't exist. With the highest level of selectivity, you save salespeople the hassle of correcting incorrect RFQs and customers the inconvenience of inaccurate or incomplete requests.

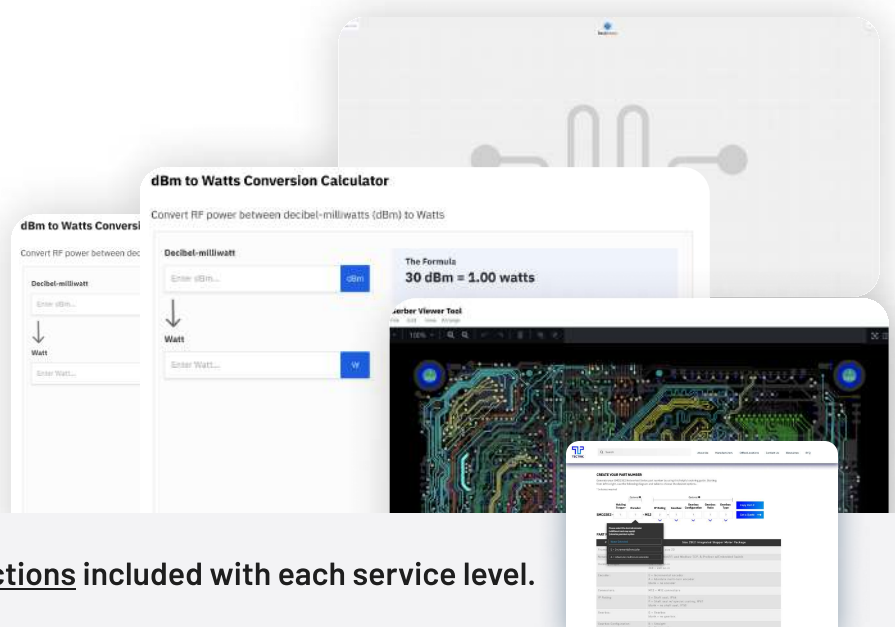

Integrate with ease

No matter your setup, EETech's Part Number Builder seamlessly integrates into your existing site. Our team's vast experience ensures that you receive the support you need, through implementation and beyond.

Auxiliary EETech Design Tools

- Calculators
- Gerber Viewer
- PDF Jot
- Part Configurator
- Part Number Builder
