

Keyword Search

Keyword search is critical to your site. Built to meet the complex needs of B2B companies, EETech Keyword Search is easy to deploy and fully managed, while offering sophisticated management and reporting functions.

Stop worrying that your search results are unreliable or your user experience too slow. Our cutting-edge technology simply delivers.

Technical Search Tailored for Your Company

We're a **specialist, not a generalist**. That means we build fully managed, industry-specific Search solutions with tailored templates, curated results, and actionable analytics. At the same time, we're constantly innovating and integrating technologies - we apply context leveraging from multiple data sources, an easy-to-use interface, and correct results at the right time.

Empower Users With Proven Search Coverage

Help users navigate the digital maze of B2B industry documents.

Features:

- Keyword/part number search in a central location
- Multi-domain search
- Fully managed solution

Optimize Part Finding

Streamline this critical task for engineers.

Features:

- Full part number and partial part number search
- Cross reference
- Custom advanced filters

Collect and Manage Your Data

Destroy data silos and index data your way.

Features:

- Data source API
- Automated crawler
- Online user portal

Upgrade User Experience and Ditch Abandoned Carts

Convert browsers into buyers with tools built for the electronics industry.

Features:

- Custom banners
- Spelling suggestions
- Auto-suggest
- Relevance ranking
