

Parametric Search

Parametric search leverages cutting-edge technologies to guide users quickly to the precise information they need. Built to meet the complex needs of electronics industry companies.

Delivers a sleek user interface, blazing speed, robust technologies, and sophisticated and actionable analytics. Speed, accuracy, and relevance are the hallmarks of our product.

Get a Customized Product Out of the Box

We're a specialist, not a generalist. That means we build industry-specific Search solutions with tailored templates and actionable results. In the electronics industry, complex products demand robust search. Our parametric search meets the expectations of users in today's digital world, as they navigate seemingly endless product variants and product categories. Ours is an experience built by engineers, for engineers.

Simple Setup

Our intuitive web portal lets you upload data, manage changes, and configure your engine — all in one place. And with a ready-to-go front end, you can be up and running in minutes.

Features:

- Self-service online portal
- No development required
- Simply upload a spreadsheet to get started
- Install with a script tag

Configure Results Your Way

The flexibility of our Parametric Search empowers you to configure the results in the ways that work best for your business. Don't settle for a one-size-fits-all approach; we won't.

Features:

- Handle several data types
- Create tailored templates
- Reorder filters and columns

Simplify Maintenance

We streamline parametric data management so that your product-support teams can focus on product differentiation.

Features:

- Data source system integration
- Automate product updates
- Easily add new products

Extend the Interface

Customize the parametric search interface using our online portal or our comprehensive set of APIs.

Features:

- Product data displays in millisecond
- Mobile-responsive table and card product view
- CSS hooks for custom styling
